WORK EXPERIENCE

Codigo - The Mobile App Company (Oct 2018 – Present)

Tech Lead (.NET) (Jan 2023 – Present)
- Technical Guidance: Provide technical leadership and guidance to the development team, assisting in architectural decisions and ensuring adherence to best coding practices.
- Collaboration with Stakeholders: Work closely with project managers, product owners, and other stakeholders to understand project requirements, offer technical insights, and define realistic timelines.
- Collaboration with Other Teams: Collaborate with frontend developers, UX/UI designers, and other teams to ensure seamless integration between the frontend and backend components.
- Documentation: Encourage and ensure the team maintains clear and updated technical documentation using miro and docs, making it easier for team members to understand and contribute to the project.

Backend Team Lead (.NET) (Jan 2022 – Present)
- Team Management: As a Backend Team Lead, responsible for leading and guiding the development team. This includes task assignment, setting goals, providing feedback, and ensuring effective communication within the team.
- Architecture Design: Collaborate with architects and stakeholders to design scalable and efficient backend solutions using .NET technologies, ensuring they meet the project requirements and industry best practices.
- Project Planning and Execution: Work closely with project managers to plan and execute backend development tasks, ensuring timely delivery and meeting project milestones.
- Troubleshooting and Issue Resolution: Assist the team in diagnosing and resolving complex technical issues that arise during the development process.
- Continuous Integration and Deployment: Implement and manage CI/CD pipelines to facilitate automated testing, code deployment, and integration of new features.

.Net Developer (Oct 2018 – Present)

- API Design: Design and architect robust and scalable APIs using .NET technologies, adhering to industry best practices and API design principles.
- API Development: Develop API endpoints and services in C# using .NET frameworks like ASP.NET Web API or ASP.NET Core, ensuring proper functionality and performance.
- Data Handling: Implement data serialization and deserialization techniques to manage data exchange between the API and client applications.
- Security: Incorporate secure authentication and authorization mechanisms into the API, protecting sensitive data and preventing unauthorized access.
- Collaboration: Work closely with frontend developers, mobile app developers, and other stakeholders to ensure seamless integration with their applications.

Projects: Isetan, Don Don Donki, Yoga Movement, Kcuts

**Myanmar High Society (Jan 2015 – Sep 2018)
Senior Developer Team Lead**

Myanmar based company and worked offshore development and outsourcing project. Worked as Requirement gathering, Analysis, Application development, Project Team Lead and Customer Support. Maintaining issues of In-house applications and troubleshoot the problems by team, deploying the new patches. Training to OJT. Designing Application and Database.

Projects Type: ERP, HRMS, Ecommerce, School Management

EDUCATION

Diploma in Software Engineering (2014)
National Management College (Yangon Myanmar)

.Net Framework, ASP.NET (2013)
Gusto Higher Education Institute

2nd Year, Mechanical Power (2009 – 2012)
West Yangon Technological University
